Professional Summary

Driven and hands-on Technical Implementation Engineer with experience in Fiorano ESB environments, specializing in API development, deployment, and production support for enterprise banking systems. Skilled in interacting with the Fiorano middleware layer, maintaining live integrations, troubleshooting service issues, and ensuring business continuity in mission-critical applications. Experienced in collaborating with QA, DevOps, and business teams to deliver secure, compliant, and scalable middleware solutions. Complemented by a solid foundation in full-stack software development using Next.js, React.js, Node.js, MySQL, and MongoDB, bringing a well-rounded perspective to implementation projects.

Skills

- Full-Stack Development & Automation (React.js, Node.js, Meteor.js)
- API Development & System Integration (REST APIs, Fiorano ESB, IPN, TIBCO)
- IT Support & Infrastructure Operations (Troubleshooting, Certificate Management, Monitoring)
- Database Management (MySQL, MongoDB, Oracle SQL)
- Cybersecurity & Certificate Lifecycle Management
- Cross-functional Collaboration & Agile Delivery

Professional Experience

Technical Implementation Engineer – Diamond Trust Bank – Nairobi, Kenya (Nov 2024 – Current)

- Delivered daily production support across Billers (NSSF, SHA, ECZ, KPA), Payments, and Western Union systems.
- Administered digital certificate processes for high-risk systems ensuring secure PROD environments.
- Managed API integration and partner onboarding, resolving API-related challenges.
- Built and deployed 10+ production-ready APIs in Fiorano ESB following QA & UAT protocols.
- Engineered automation utilities (JavaScript, Node.js) for validations & fintech integrations.
- Developed dynamic PDF generation tools using Rhino/JS for DB/XML data extraction.
- Built API Documentation Site with Next.js + MySQL for centralized developer access.

Software Engineering Intern – Quantum Plus Kenya (May 2024 – Aug 2024)

- Developed and maintained dynamic web applications (React.js, Meteor.js).
- Implemented responsive UIs with HTML5, CSS, Tailwind CSS.
- Managed MongoDB databases and collaborated on version control via GitHub.
- Provided IT system support and managed updates/software installations.
- Participated in agile methodologies: stand-ups, code reviews, sprint planning.

Education

BSc Mathematics and Computer Science, Kenya Methodist University – Meru, Kenya (Oct 2024)

Kenya Certificate of Secondary Education (KCSE), Allidina Visram Highschool – Mombasa, Kenya (Apr 2021)

Kenya Certificate of Primary Education (KCPE), Aga Khan Primary School – Mombasa, Kenya (Nov 2016)

Certifications

- Oracle Cloud Infrastructure
- Cisco CPP Advanced Programming

Achievements

- 2025 Inter Banks Games Snooker Winner
- Best Chess Player Award (2015, 2016, 2021)
- 2nd Runners Up – Young Scientists Kenya
- 1st Runners Up – Allan Gray Foundation Competition (2021)
- English Access Scholarship USA Program Member (2018-2021)
- Table Tennis Vice Captain (2018-2022)
- Chess Captain (2014-2016)

Projects

- Fingerprint Login System: Integrated hardware fingerprint scanner with C++ & web app for secure authentication.
- Employee Attendance System: Check-in/out system with statistical tools for performance insights.
- Hotel Booking System: Online booking platform with full reservation management.

Hobbies & Interests

Swimming, Chess, Table Tennis, Badminton, Football, Hiking, Camping, Pool, Billiards, Darts, Hackathons, Coding Camps
